

APPS FOR SEAMLESS MOBILITY

Plan, book, pay and ride

HAFAS.mobile lets riders enjoy a seamless door-to-door travel experience. Whether you need trip information, route planning or ticketing for buses, trains, trams, ferries, e-scooters or shuttles – this is all possible in a single app.

Our mobility apps have been downloaded over 200 million times worldwide. What started out as a classic timetable information system, has evolved into an easy-to-use Mobility as a Service (MaaS) platform. Our technology can link different modes of transportation to provide intermodal travel chains – with over 80 different mobility providers integrated into HAFAS.mobile.

Travelers use HAFAS.mobile to reach their destination comfortably, efficiently and seamlessly. We combine clear travel information with a simple booking process and contactless ticketing – all with just one login. Push alerts in the event of delays, real-time information, a simple payment process, barrier-free design and many other features make HAFAS.mobile a reliable companion for your passengers.

FEATURE RANGE

The basic functionalities of HAFAS.mobile can be easily upgraded with a variety of features, e.g.

- » Push alerts
- » Occupancy display
- » Comparison of CO₂ emissions
- » Traveler Relationship Management (HAFAS.trm)
- » Newsfeed
- » Live Map
- » Dark Mode

ANDROID AND IOS SUPPORT

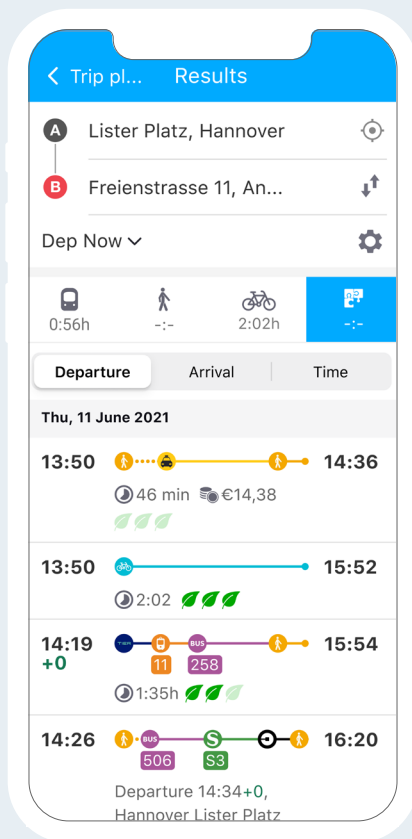

HAFAS.mobile is available and optimized for Android and iOS with a clear user interface design.

ACCESSIBILITY

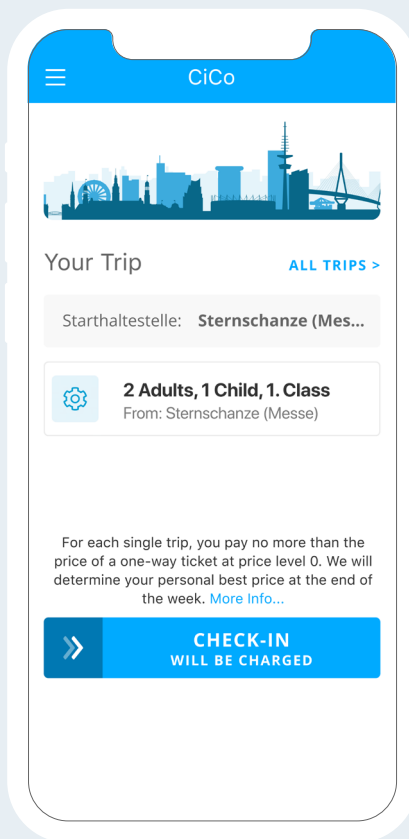

To guarantee access for blind and visually impaired users, we define and test using talkback and voiceover for each feature of HAFAS.mobile.

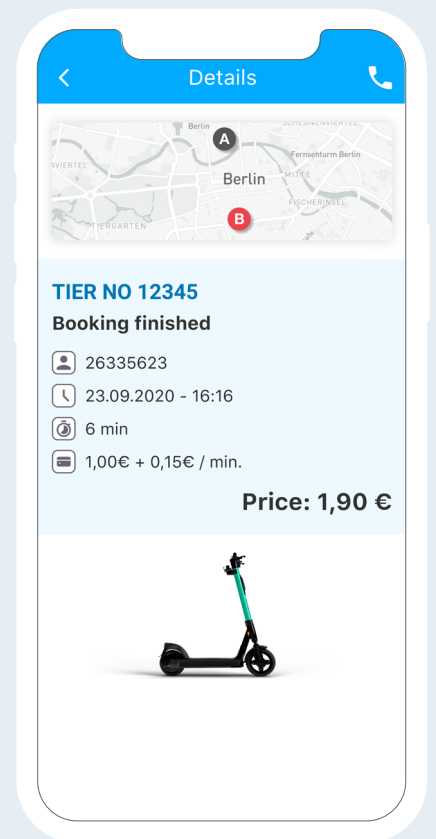

REFERENCES

The connection overview shows various inter-modal travel options. In addition to real-time data, we also visualize information on the environmental compatibility of each route.

When starting a journey, simply check in with a swipe and then check out again at your destination: XiXo calculates the best price for all trips made at the end of the billing period.

In addition to public transport, we integrate a large number of mobility providers into HAFAS.mobile to enable seamless travel.

We make mobility as easy as it gets: For passengers and for transport providers. Our software solutions ensure that passengers get from A to B comfortably and seamlessly – from trip planning, reservations, passenger communication and mobile ticketing to comprehensive MaaS solutions and On-Demand-Services. We support transport providers with fleet, disruption and data management, timetabling and live dispatching tools. We are: Siemens Mobility, Hacon, Sqills, eos.uptrade, Bytemark and Padam Mobility.
